# ExplorNet's *Digital Media II*

Objective 204.02 3%
Select and utilize tools for digital animation production.

Interactivity Terms

❑ ActionScript

  ☐ The language of computer code that is used by Adobe Flash to create user interactivity in animations (buttons, controls, links, etc.).

❑ Script Assist

  ☐ A feature found in the actions panel that can be used to generate ActionScript without writing code from scratch.

Interactivity Terms

❑ Code Snippets

   ☐ Small blocks of ActionScript that can be applied to an object or the animation in general.

❑ Instances

   ☐ Editable copies of symbols that can be changed individually after dragging them from the library.

Interactivity Terms

❑ Button State

  ☐ The specific visual appearance of an interactive button that corresponds to the particular phase of interaction.

Interactivity Terms

- ❑ Up State
  - ☐ When the button is not rolled over or pressed down; the normal appearance of a button.

- ❑ Over State
  - ☐ When the mouse cursor hovers over the button.

- ❑ Down State
  - ☐ When the button is clicked and held down.

- ❑ Hit State
  - ☐ Not a visible change; the clickable area of the button or hot spot.
